OFFICE OF PETITIONS

DECLARATION OF MICHAEL CHAN

Sir:

I, Michael Chan, being duly sworn, do hereby declare and state:

1. I am employed as a Senior Attorney in the Intellectual Property Section of the Law Department of NCR Corporation. I am located in the Dayton offices of the NCR Corporation.

2. I work with Christine Sheppard, Paralegal in the Intellectual Property Section of the Law Department, who is located in the London offices of the Intellectual Property Section of the Law Department of NCR Corporation.

3. I am responsible for preparing and prosecuting patent applications for the Financial Solutions Group of NCR Corporation.

4. On September 12, 2001 or thereabouts, an electronic copy of the specification, claims, and drawings for priority patent application Serial No. 0027330 filed November 9, 2000 in the U.K. Patent Office was received from the London offices of the Intellectual

Property Section of the Law Department. I used the electronic copy to prepare a corresponding U.S. patent application for filing in the U.S. Patent Office.

5. On October 5, 2001 or thereabouts, a set of U.S. patent application papers (including copy of specification, claims, drawings, declaration of inventors, and assignment for inventors) corresponding to the above-identified U.S. patent application, Serial No. 09/992,240, was sent from the Dayton offices to the London offices of the Intellectual Property Section of the Law Department for subsequent forwarding to inventor Robin Mackay to sign the declaration and the assignment.

6. On November 6, 2001, a copy of U.S. patent application papers (including copy of specification, claims, drawings, and an unsigned declaration) corresponding to the above-identified U.S. patent application, Serial No. 09/992,240, were filed in the U.S. Patent Office. The above-identified U.S. patent application claims priority of priority patent application Serial No. 0027330 filed November 9, 2000 in the U.K. Patent Office.

7. On December 11, 2001, a Notice to File Missing Parts of Application (Filing Date Granted) dated December 6, 2001 from the U.S. Patent Office was received in the Dayton offices of the Intellectual Property Section of the Law Department.

8. On January 15, 2002 or thereabouts, upon realizing that the U.S. patent application papers including executed declaration of inventor for the above-identified U.S. patent application, Serial No. 09/992,240 would most likely not be received in the Dayton Offices of the Intellectual Property Section of the Law Department for filing in the U.S. Patent Office, I started to prepare a Petition under 37 C.F.R. Section 1.47(b) along with its accompanying papers for filing in the U.S. Patent Office.

9. On April 2, 2002, a set of documents including Christine Sheppard's affidavit and its accompanying exhibits were received from the London offices of the Intellectual Property Section of the Law Department.

10. On April 2, 2002 a new "Combined Declaration and Power of Attorney" was prepared for execution by a representative of NCR Corporation who has sufficient proprietary interest in the above-identified application.

11. I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

WHEREFORE, I hereby subscribe my name to the foregoing declaration.

Signed at Dayton, Ohio this 3RD day of April 2002.

DECLARATION OF CHRISTINE SHEPPARD

Sir:

I, Christine Sheppard, being duly sworn, do hereby declare and state:

1. I am employed in the Intellectual Property Section of the Law Department of NCR Corporation. I am located in the London (United Kingdom) office of NCR Corporation.

2. I work with Michael Chan, Senior Attorney in the Intellectual Property Section of the Law Department of NCR Corporation, who is located in the Dayton offices of the Intellectual Property Section of the Law Department of NCR Corporation.

3. I am responsible for patent formalities for the Financial Solutions Group of NCR Corporation.

4. I work with inventors (including Robin Mackay who is an inventor in the above-identified U.S. patent application, Serial No. 09/992,240) located in the United Kingdom to prepare patent applications for filing first in the U.K. Patent Office.

5. On June 6, 2000, an Invention Disclosure entitled, "A System and Method for Consumers to Store, Share and Access Information Concerning Products for Sale " was received from the inventor (See Exhibit A for copy of the Invention Disclosure submitted by the inventor).

6. On November 9, 2000, a priority patent application Serial No. 0027330 corresponding to the above-identified U.S. patent application Serial No. 09/992,240 was filed in the U.K. Patent Office.

7. On September 12, 2001 or thereabouts, a copy of the specification, claims, and drawings for priority patent application Serial No. 0027330 filed November 9, 2000 in the U.K. Patent Office was sent to the Dayton offices of the Intellectual Property Section of the Law Department for filing a corresponding patent application in the U.S. Patent Office.

8. On October 8, 2001 or thereabouts, a set of U.S. patent application papers (including copy of specification, claims, drawings, declaration of inventors, and assignment for inventors) corresponding to the above-identified U.S. patent application, Serial No. 09/992,240, was received by from the Dayton offices of the Intellectual Property Section of the Law Department for forwarding to inventor Mackay, the inventor in the above-identified U.S. patent application, to sign the declaration and the assignment. As of October 8, 2001, the aforesaid inventor was not in the employ of NCR Corporation.

9. On October 10, 2001, the U.S. patent application papers received on October 8, 2001 or thereabouts from the Dayton offices of the Intellectual Property Section of the Law Department were forwarded to inventor Mackay at his home address, which is "1 Colman's Wharf, 45 Morris Road, London E14 6PA", for execution by the inventor (see Exhibit B for a copy of the letter sent by Royal Mail Recorded Delivery to inventor Mackay on October 10, 2001).

10. Inventor Mackay has an Employment Agreement with NCR Corporation. The Employment Agreements oblige him, *inter alia*, "...whether during or after his employment with the Company, execute any document and do any acts necessary to enable the Company or its assigns to obtain patent protection in any part of the world in respect of any invention ..." (see Exhibit C for Intellectual Property portion of inventor Mackay's Employment Agreement).

11. As of today, March 28, 2002, the documents sent to inventor Mackay on October 10, 2001 have not been returned to me.

12. I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

WHEREFORE, I hereby subscribe by name to the foregoing declaration.

Signed at London, United Kingdom this 28th day of March 2002.

Problem Solved by the Invention

A consumers' best source of information about a product service or brand (whether or not to buy it, its quality and provenance) may be other consumers' experience of that product service or brand. The Invention describes a system and method to allow consumers to share this information, and to access it easily using a wireless communication device such as a WAP-enabled mobile telephone.

Description of the Invention

The invention comprises a computer system on an electronic network (server) which contains a data storage facility and program to provide the following service:

(1) The data is segmented into channels. Each channel describes a particular concern consumers may have about a product for example, green issues; dieting issues; suitability for children

(2) Via a PC or other device connected to the server via a network, a user may enter information relating to a certain channel and a certain product. This is achieved as follows:

- (a) User identifies the product to the server; this can be done by:
 - (i) Entering the number corresponding to the product's barcode, and displayed on the product packaging with the barcode
 - (ii) Transmitting some other information which uniquely identifies the product, such as the barcode information (if the user has some barcode-reading device) or other product identifier.
- (b) User specifies which channel they wish to input information into.
- (c) User inputs the relevant information, which may or may not be reviewed by the server's administrator before being made available on the server to other users.

(3) Via a PC or other device connected to the server via a network, a user may subscribe to certain channels they are interested in. This is achieved as follows:

- (a) User sets up an account on the server by providing a unique username and password for themselves
- (b) User chooses which channels they are interested in subscribing to.

The users' profile is then stored on the server.

(4) Via a PC or other device, a subscriber may then access information on any product by the following procedure:

- (a) User enters the server by presenting their name and password
- (b) User enters the barcode number or other product-identifying data of a product.
- (c) The server provides a list of channels (i) to which the user is subscribed and (ii) which contain information on the product specified
- (d) The user can choose to read and note the information on each of these channels.

It is anticipated that step (4) could be realised from a wireless device such as a WAP-enabled mobile phone, enabling the user to access product information whilst they are out and about.
